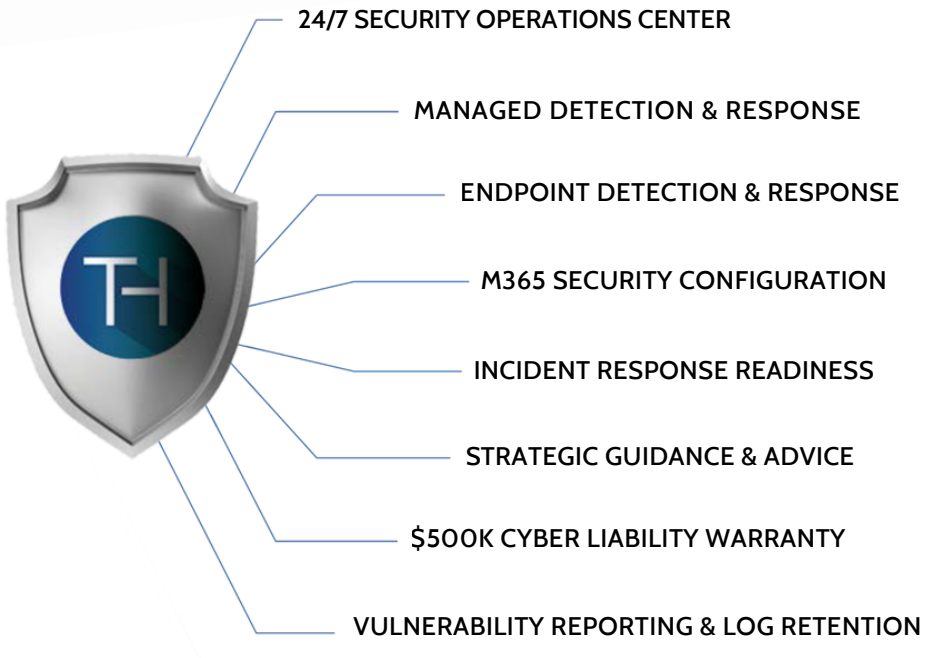
THInc. SECURE™

Unify. Protect. Respond. Always on.

Built for a Threat Landscape that Never Sleeps.

THInc. Secure is a fully managed cybersecurity program designed to unify visibility, simplify security operations, and proactively defend against modern threats.

By combining 24×7 managed detection and response, Microsoft 365 security, vulnerability management, and expert-led threat analysis into a single solution, THInc. Secure helps organizations reduce risk, eliminate blind spots, and respond faster with confidence—supported by a North America–based team of security professionals.



61%

of businesses were the target of a cyberattack in the last year[1]

50%

of all breaches involved compromised identity[2]

70%

of cybersecurity incidents involve data theft/extortion[3]

67%

of cyber victims are attacked again within the next year[1]

>$1 mil

the average impact on a business from a cybersecurity incident[1]

TECHHEADS

DETECTION & RESPONSE

Complete Visibility

THInc. Secure provides a 360° view into your environment as well as the threats and vulnerabilities that face it.

Endpoints

A kernel level endpoint agent provides deep visibility into device activity and provide a range of added capabilities beyond conventional EDRs.

Network

Network activity is collected and monitored to support threat hunting and detection.

Cloud & Microsoft 365

Integration with Microsoft 365 and other supported Cloud services to continuously monitor and stop suspicious account activity.

SECURITY OPERATIONS

24x7 Security Operations Center

Our North-American based security operations team is watching over networks, servers, databases, cloud-based services, and endpoints around the clock 365 days a year.

Microsoft 365 Security Hardening

Microsoft 365 recommended security policies and configurations are applied to strengthen security posture of your tenant.

External Threat Monitoring

Monitor your external defenses for weaknesses, including exposed services, public IP addresses and domains, known services vulnerabilities, and email domain protection.

Enhanced Threat Analysis

Human security analysts conduct additional review of escalated automated detection cases and perform threat root-cause analysis upon request in response to a security event.

Microsoft 365 Configuration & Policy Backup

After security hardening, we monitor for any drift of your baseline or changes to your policies and settings, with daily backups and a full audit trail.

Dark Web Monitoring

Monthly scanning to identify if your organization's data is appearing on the dark web. Daily scanning also available.

RISK & COMPLIANCE

Go Beyond MDR

Stay out in front of emerging risks while also preparing for an effective response and successful recovery in the event of a security incident.

Cyber Liability Warranty

Qualified businesses are eligible for a $500,000 cyber liability warranty included with their THInc. Secure subscription at no cost. See agreement for details of qualification criteria.

Incident Response Readiness

Improve readiness of your organization to respond to a security incident and ensure internal stakeholders know what actions to take for the best possible outcome.

Vulnerability Reporting & Log Retention

Ongoing detection for misconfiguration and risks with reporting on vulnerabilities and log retention to support compliance with standards like HIPAA, CIS, ISO, Cyber Essentials, and GDPR.

Strategic Guidance & Advice

Consultations with a CISSP on security posture, vulnerabilities, resolved/ongoing security issues, incidents, security mechanism deployment, identity and access management, and planning.
